

BKA Solutions Inc.

BKA Solutions provides our clients with advisory, strategic, and practical digital transformation solutions to align operations with their business strategies and goals. We execute and deliver project success through collaborative and agile approaches. Focusing on people, process, and technology, we guide our base of clients and build their internal core competencies for both dramatic results and continual value-added improvements.

We offer services in project management, system audits, business process improvements, reporting/BI/data analytics, SYSPRO ERP upgrades/implementation, integrations, training, and support.

As a trusted Digital Advisor, our clients have access to grants for current system evaluations, process reviews and digital transformation plans.

We have clients in various industries such as Food and Beverage, Building Products, Wholesale/Distribution, Plastics and Metal Fabrication, Heavy Equipment and Consumer Projects. Examples of specialized projects include:

- Intercompany workflows and automations
- Integration of ecommerce to ERP
- EDI trading partner document transmission and integration to ERP
- ERP and system migrations
- Warehouse Management System and label design
