Problem: Processing Semi-Structured, Non-Standardized Documents

Documents received by Transportation and Logistics companies are **extremely messy**

Inefficient and labor intensive to processing incoming documents and entering data into systems

Expensive low value tasks, no one wants to be a data entry clerk, accelerated by **labor shortage issue**

Specializing in International Trade and Freight Documents

- Bill of Lading
- Packing List
- Cargo Manifest
- Certificate of Analysis
- Commercial Invoices
- Waybill
- Statement of Facts
- Proof of Delivery
- Hazmat Documents
- Arrival Notice

Case Study with a Canadian Freight Forwarder

15 FTE ($1M CAD in annual labor cost), processing 30,000 pages monthly only, that's about $3 per page

Solution: Intelligent Document Processing Technology

Powered by Artificial Intelligence

- Fast & Accurate Data Extraction for Non-Templated Documents
- Automate System Data Entry
- Enabling Intelligent Process Automation
- Data-Driven Business Intelligence
- Cloud-Based, Resource-Lite Deployment

Over 80% Time and Operational Cost Saving by Removing Manual Document Extraction and Data Entry

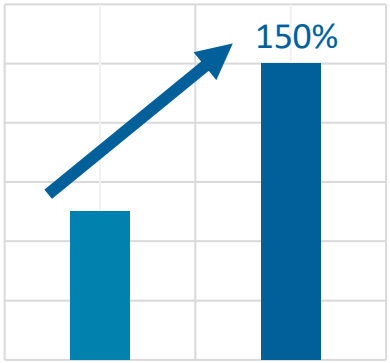
Happy Customers

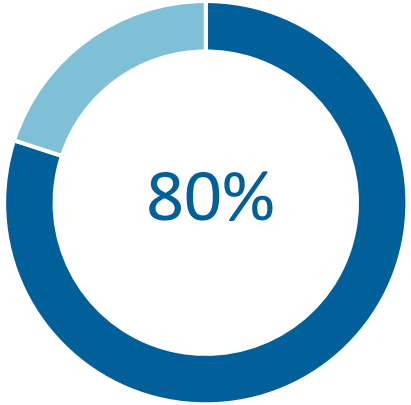
150% Productivity Increase



Capable to **process 1.5x Manifest documents** to CBP/CBSA Border Agencies for Cross-Border Ground Shipments, **without hiring extra staff**.

Enabling trucks crossing border without wait time, generating more revenue for their clients.

Time Saving



Reduce by 80% the lead time required to evaluate and to release shipments, by using the captured data with **business rules automation** and **exceptional management.**

Advanced analytics helps to risk assess continuously suppliers, actively preventing issues before it arises.

Onboarding Made Simple

Requirement Gathering

- Collect requirements on document types, data, system, workflow and business rules with **onboarding wizard**
- Validate requirements on customization and/or integration

2 weeks

Deployment for Pilot Run

- **Pilot Run** to validate all requirements are fully deployed
- Pre-Production Staff Training / Change Management

2-4 weeks
(excluding integration)

Deployment for Pilot Run

- **Full Peace of Mind**
- Continue working on System Integration and other advanced features implementation

1-Month of Hyper Care

Key Benefits

Remove Low-Value Work

Automate document capture and data structuring into your operating systems

Optimize Your Operations

Improve your Operational Efficiency with Intelligent Process Automation

Make Informed Decisions

Increase Competitive Advantage with your Business Intelligence
