

Q·RESERVE

SMART WORKPLACE SCHEDULING CLOUD SOFTWARE

What We Do

QReserve's product suite provides smart tools to schedule thousands of meeting rooms, laboratories, office spaces, hot desks, tools, and people every day. Our powerful online booking platform **automates complex rules, integrates with physical spaces**, and helps world-leading research, corporate, and academic institutions **run smoothly**.

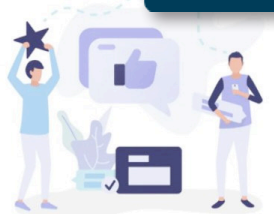

Who We Work With

- Research centers and labs
- Makerspaces and incubators
- Equipment lending libraries
- Media spaces and digital labs
- Innovation hubs
- Consortiums and associations
- Conference facilities
- Office buildings

"Overall this has been one of the best software deployments I've been involved in, uptake has been universal and training times minimal. I'm extremely confident we made the correct choice in using this."

-Ian G., Technical Leader

Q·RESERVE

Integrations

Website integration

QReserve can easily embed into your website to make searching for resources or viewing upcoming schedules easy. Insert only a couple lines of code to get started.

Single Sign-On

Make signing in for users seamless and easy with QReserve Single Sign-On integration via SAML2 and Shibboleth.

Kiosks

Compatible with any tablet display or computer with internet access, add Kiosks to display resource availability, upcoming schedules, and streamline reservation processes.

Calendar sync

QReserve connects to your other calendar apps! This set of apps includes (but is not limited to) Google Calendar, Apple Calendar, Yahoo Calendar, Mozilla Thunderbird and Microsoft Outlook.

Barcode scanning and QR codes

Use QReserve's automatically generated QR Codes or assign existing barcodes to resources to streamline the reservation process and quickly access information about a tool or a person with a quick scan. Compatible with most USB barcode scanners in most web browsers.

Usage tracking and sensors

QReserve's sensor integrations track resource utilization metrics directly into QReserve. Capture when a space is occupied, cancel missed reservations, and record real-time resource activity.

CFI Research Facilities Navigator

Canadian researchers can easily prepopulate a CFI Research Facilities Navigator intake form with information already stored in QReserve to save time and reduce data entry tasks and errors. [Read More](#) 🇨🇦

Credit card processing

Help your users pay their fees quickly with integrated credit card payments! Invoice users based on reservations, services, or ad-hoc purchases.

Intuit QuickBooks Online

Integrate with your Intuit QuickBooks account to easily upload invoices and payments directly into QuickBooks and make account and business management a breeze!
