

## **Create Custom AI Model On Your Own Data**

AI that you may effortlessly integrate into your life to help to complete your daily tasks fast. Focus on creativity and decision-making; routine and intellectual work becomes 10X faster with the help of Younet.

# Younet AI + Your Data = Custom AI Model That Knows Everything You Know and More

## Connect Your Data

Build your personalized AI agent by connecting your data knowledge and create advanced AI models that possess your unique expertise. Unlock the power of AI that truly knows what you know.

# Communicate With AI Model

Have a personalized AI model at your disposal for any queries related to business, analytics, writing, education, personal tasks, or any cognitive work that you require assistance with. You maintain authority over the type of data that the AI can comprehend and analyze.

 Client

Could you recommend a suitable cellphone plan for our company? We have 6 employees, and 4 of them frequently travel, requiring an international plan.

 Response

I can definitely help you with that. Based on your company size and needs, I can offer you the following cellphone plans:

- 1) 2 corporate Business Standard plans that cost \$49.99/month.
- 2) 4 corporate Business Travel plans that cost \$89.99/month. The total monthly cost for all 6 plans would be \$459.94/month.

In order to secure this offer, please register using [this link](#).

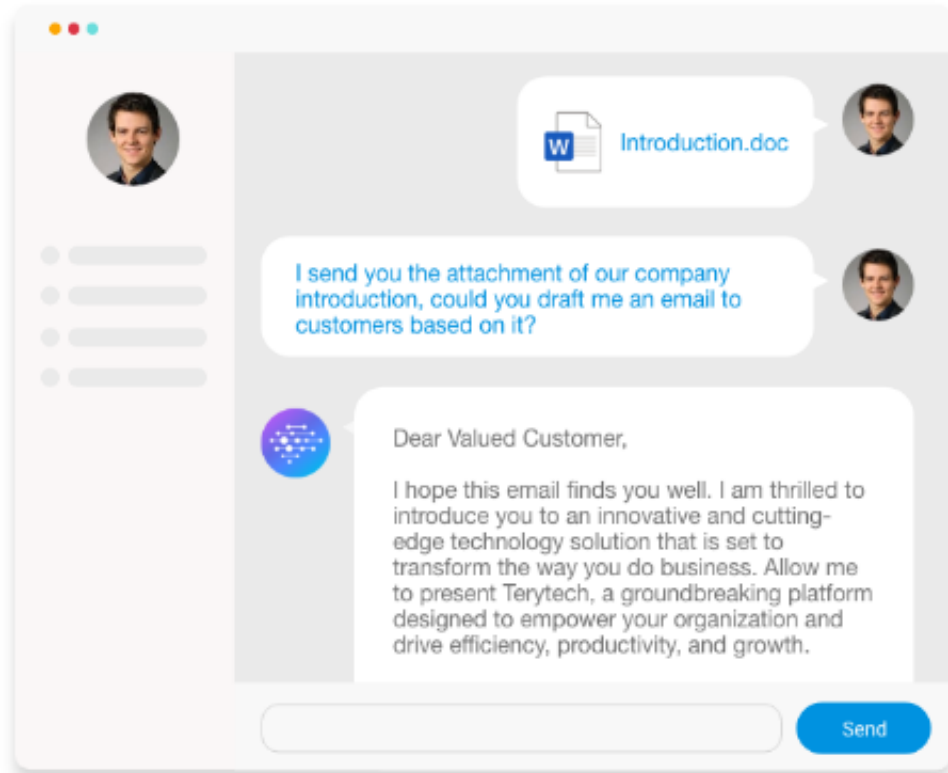

## Use it anywhere you want

Add the Younet browser extension and simplify your response across all platforms, including CRM, email, help desk, social media, online forms, and websites, and more.

## AI agent just like your best employee

- Analyze your business with AI;
- Generate responses to clients' questions;
- Trains your AI agent to know your business just like you;
- Create articles, letters, emails, agreements, presentations, and more.

# Testimonial

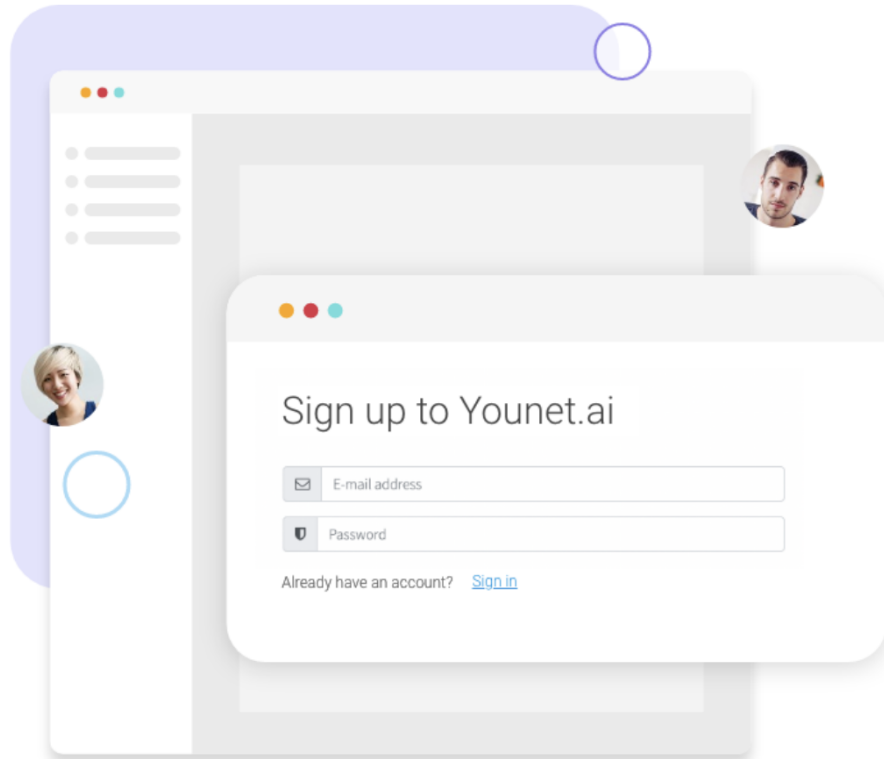

Our experience of working with clients for more than 15 years made us realize that a large portion of them had similar inquiries. Thanks to the remarkable assistance of Younet, we successfully automated our client communication process. By training Younet AI model as if it were a new employee, we witnessed its exceptional ability to respond to queries and compose emails on our behalf. This revolutionary automation resulted in an outstanding tenfold increase in our overall efficiency.

Matt Rasner, Business Development Manager

# How does Younet AI can integrate in your life?

1

## Step 1: Create an account

Ready to become a part of the AI chatbot revolution? Let's begin by logging in to your Younet account. If you haven't signed up yet, create a free account today.

Next, go to the Younet Library and select "Younet" from the list of content templates.

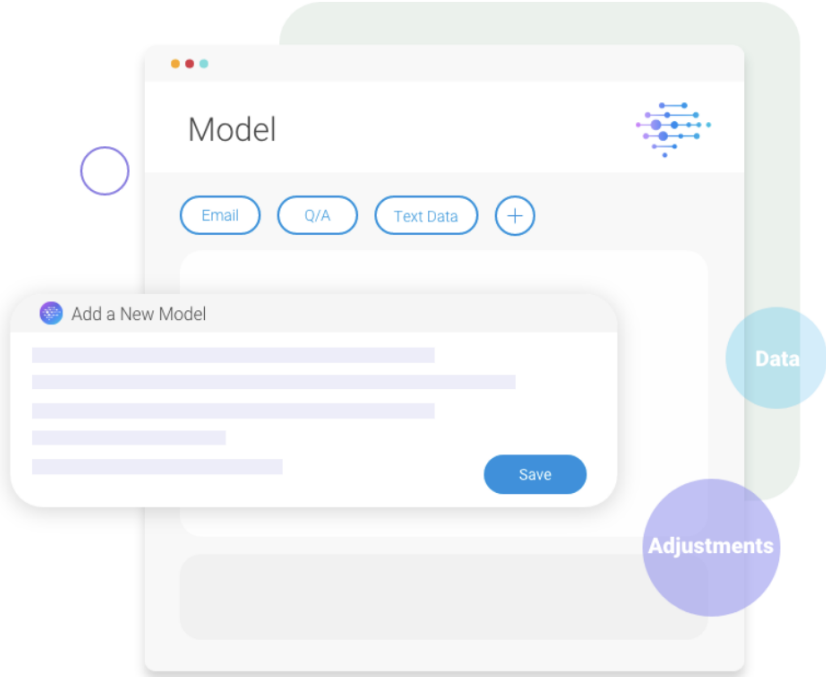

# Step 2: Create a Model and train your AI to know what you know

The artificial intelligence machine comes equipped with initial extensive knowledge and may be used as a chatbot.

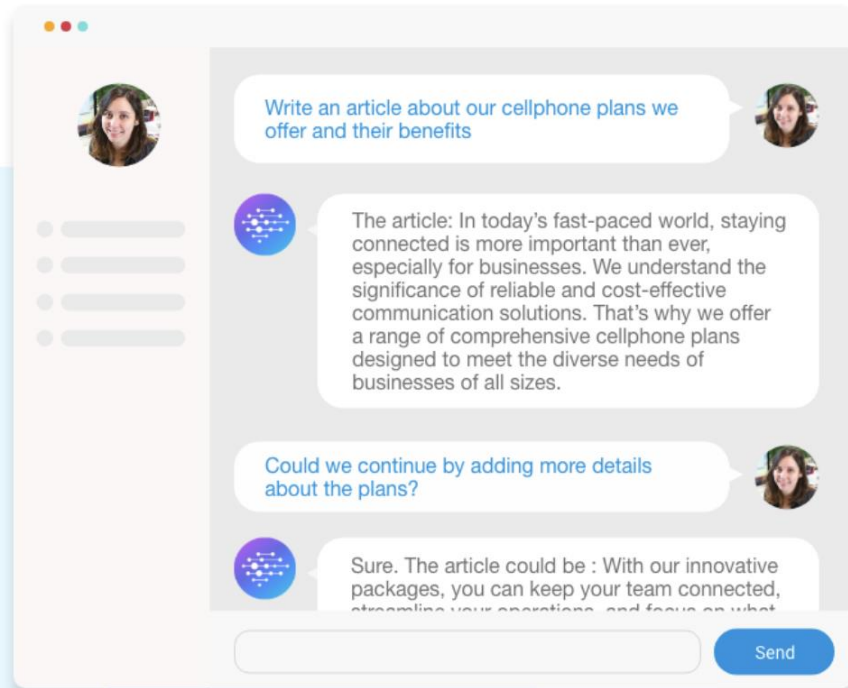

To further customize it to your area of expertise, our intuitive Q&A feature will guide you through the process.

You can describe your responsibilities and roles by answering a set of questions. Additionally, you can establish a knowledge base by sourcing text data, documents, or connecting your email conversations from Gmail, Yahoo, Outlook.

2

3

### Step 3: Chat with AI.

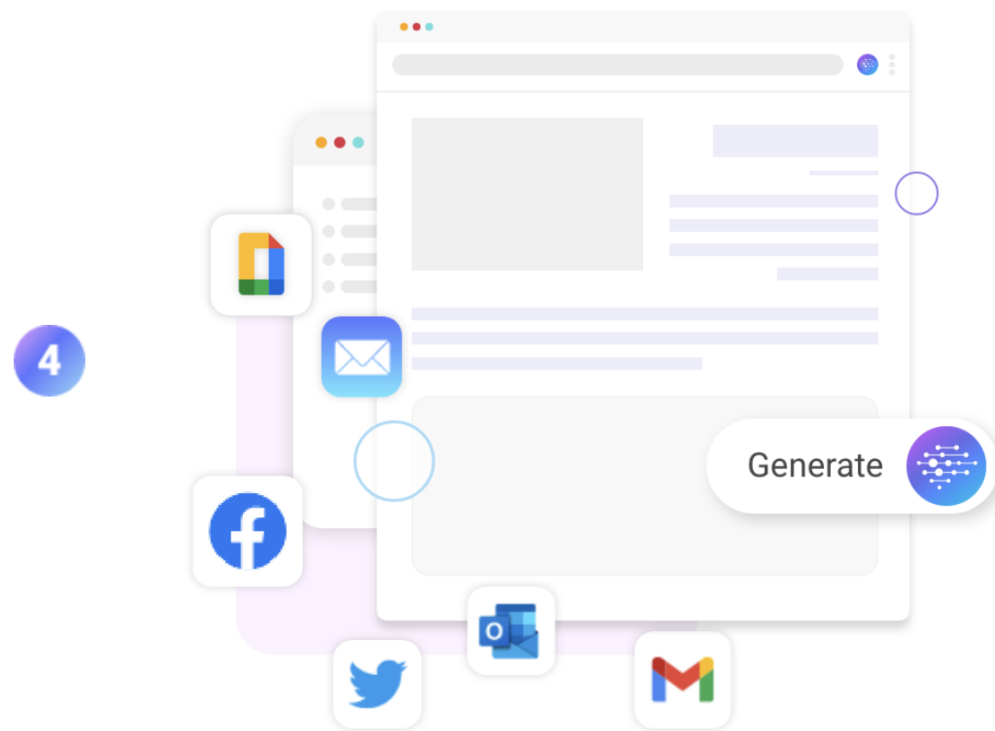

See how AI has learned about your expertise and start using it internally as a chatbot, or proceed to Step 4 to intergrate it with external communication application.

## Step 4: Connect to Communicate

Younet extension makes it easy to bring AI to any application with just a click, whether you want to respond to a message or draft a new one.

It uses the knowledge you've provide to communicate effectivly. Each time you use it, it gains insights from the conversations and improves itself.

In additons to supporting Chrome extension, Younet's current version also supports API integration, allowing you to deploy your AI model in any third-party application.
