Testimonials

1. Making Everyone Happy

Our clients span almost every industry, including: advertising, automotive, financial services, mining, property management, manufacturing, new media, real estate, web design and hosting, transportation and many others. What makes them all similar is the need for affordable, dependable IT systems and support. Here's what just a few of them had to say about their experience with Appsonnet

"Several years ago we hired Applications on Networks to redesign and upgrade our IT infrastructure. In addition to upgrading our hardware they led a transition across two data centres and upgraded network communications between our offices in Toronto and New York. The results were outstanding! Our costs were cut in half and our network efficiencies tripled!"

"With their assistance, we've been able to effectively manage our continued growth; focusing on scalability, cost savings and efficient network topologies. Whether it's after hours support, a general question or a hardware related emergency, I know that the team at Applications on Networks has my back."

"We looked at several IT providers and chose Appsonnet because they explained their recommendations in a way that I could understand and without trying to oversell us. I connected with them immediately. Since then, we've been delighted with our decision. The quality of their service is outstanding. We have our own dedicated Appsonnet technician, and he always returns our calls promptly and patiently. It feels like we have our own IT person onsite."

Value Proposition

Our Differentiators

Building Partnerships

- Predictable pricing
- Resourceful and flexible
- One-stop vendor management
- Your processes, your way
- Technology agnostic
- Right partners for solutions
- Grow and scale with you
