WHO WE ARE

Project R is an architecture–environment–tech partner delivering **AI-driven services** for architecture, engineering, and construction (AEC) organizations looking to scale innovation, automate workflows, and integrate critical technologies.

We specialize in helping teams integrate **AI, automation, and data intelligence** across the project lifecycle - from ideation to delivery - to build future-ready environments and infrastructure.

Our Services Cover:

- **✓ AI-Augmented Analytics & Simulation**
Train staff to interpret, leverage AI-driven predictive models for performance, climate, spatial planning.
- **✓ Design & Construction Automation**
Learn to develop or use custom workflows to automate CAD, BIM, plans, and generative design.
- **✓ Data Integration for AEC**
Equip teams to connect geospatial, design, and operational data to streamline decision-making.
- **✓ Generative AI & AI-Assisted Visualization**
Use AI tools (Stable Diffusion, Runway, Midjourney) to generate imagery, moodboards, design options.
- **✓ Digital Twin Integration**
Enable teams to prototype and manage real-time simulations for infrastructure or site-scale.
- **✓ Web Development for AEC Applications**
Train internal teams to create dashboards, internal tools, and ui interfaces tailored to aec.
- **✓ Project Lifecycle Optimization with AI**
Apply AI models to shorten cycles and reduce redundancy in planning, design, and delivery.
- **✓ Sustainable Design Intelligence**
Train on carbon analysis, regenerative arch modeling, environmental performance modeling using ML.
- **✓ AI-Assisted Code & Regulation Compliance**
Use NLP and AI tools to check for zoning, building code, and landscape compliance.

WHY PROJECT R?

-  Deep domain expertise in AEC + Environment + Tech
-  Customizable and modular AI training tailored to your workflows
-  Proven reduction in project overhead and time-to-completion
-  Real-world ecological, sustainability and climate experience
-  Knowledge transfer model designed for non-technical teams

HOW TO GET STARTED?

1. **Book a Discovery Call** → We'll assess your goals and training needs
2. **Scope a Digital Transformation Plan** → Fully customized and eligible for funding
3. **Deliver & Upskill Your Team** → Immediate impact, long-term growth

 *Canadian SMEs may receive up to **\$15,000** in support via the DMAP provincial program, covering up to 50% of expenses.*

Let's build your AI and automation capacity > **fast, modular, and purpose-driven.**
